

SOCIAL MEDIA POLICY

Rationale:

The use of social media websites, digital technologies and applications for personal and professional use has increased rapidly in recent years. This advancement challenges traditional concepts of teaching, learning and school community interaction. While the Department of Education and Training (DET) endorses the use of social media in a school setting, guiding principles of behavior are addressed through existing policies on the DET website. This policy aims to inform and guide the Templeton Primary School staff and community how to interact using social media. It has been developed to protect students, staff, parents, assets and reputation through clear protocols for use of social media in official and personal capacities.

Aims:

- Protect the personal information of individual stakeholders in the school community
- Monitor the collection and use of individual stakeholder photographs, films and work samples
- Respect the right of individual stakeholders to control how and for what purpose their personal information is used
- Comply with relevant legislation and Department of Education and Training (DET) policy

Implementation:

Consent is required from parents/guardians before the school can publish student photographs, films and work samples.
